KEYWORD INDEX

A

Acetabularia — The effects of blue and red light on *Acetabularia mediterranea* after long exposure to darkness, 227

***N*-Acetyl-D-glucosamine** — Attempted localization of a substrate for chitinases in plant cells reveals abundant *N*-acetyl-D-glucosamine residues in secondary walls, 343

Acrosome — Immotile, aflagellate spermatozoa in Ptiliidae coelopterans, 185

Actin — A possible role of actin in the mechanical control of the cell cycle, 353

Actin-spectrin — Actin and spectrin-like (M_r = 260-240 000) proteins in gregarines, 173

Action potentials — The effects of blue and red light on *Acetabularia mediterranea* after long exposure to darkness, 227

β-Adrenergic — Microfilaments and cellular signal transduction: effect of cytochalasin D on the production of cAMP, inositol phosphates, and on calcium movements in rat parotid glands, 61

Aflagellarity — Immotile, aflagellate spermatozoa in Ptiliidae coelopterans, 185

Aggrephores — Wheat germ agglutinin (WGA) reduces ADH-induced water flow and induces cell surface changes in epithelial cells of frog urinary bladder, 103

Amphibian — Genetic evidence for linkage with the Z and W sex chromosomes of two distinct couples of alleles controlling larval and postmetamorphic skin pigmentation in salamander, 1

Anti-fibronectin serum — Anti-fibronectin serum inhibits the disorganization of the dermal-epidermal junction in cultured wounded skin, 91

Antidiuretic hormone — Fluorescence labelling of proteins related to ADH-induced change in frog bladder luminal membrane, 115

Astrocytes — Are close contacts between astrocytes and endothelial cells a prerequisite condition of a blood-brain barrier? The rat subfornical organ as an example, 159

Avidin — Modification of cell evagination and cell differentiation in quail oviduct hyperstimulated by progesterone, 123

B

Benzoxazinone — Benzoxazinone derivatives: new fluorescent probes for two-color flow cytometry analysis using one excitation wavelength, 193

Beryllium — Cytochemical study of abnormal intranuclear structures rich in beryllium, 147

Blood-brain barrier — Are close contacts between astrocytes and endothelial cells a prerequisite condition of a blood-brain barrier? The rat subfornical organ as an example, 159

C

Ca^{2+} regulation — Motility processes in Acantharia (Protozoa). III. Calcium regulation-relaxation cycles of *in vivo* myonemes, 253

Ca^{2+}-dependent motion — Motility processes in Acantharia. II. A Ca^{2+} dependent system of contractile 2—4 nm filaments isolated from demembranated myonemes, 245

Cadmium-binding protein — Translation in a cell-free system, and in *Xenopus* oocytes, of mRNA which specify a cadmium-binding protein in *Nereis diversicolor* (Annelida, Polychaeta), 167

Cell activation — Intracellular pH and the increase in protein synthesis accompanying activation of *Xenopus* eggs, 323

Cell cycle — A possible role of actin in the mechanical control of the cell cycle, 353

Cell line — The acentriolar state of the *Drosophila* cell lines 1182, 309

Cell motility — Actin and spectrin-like (M_r = 260-240 000) proteins in gregarines, 173

Cell walls — A technique for labelling the sample surface for quick-freeze, deep-etch, rotary replication electron microscopy: application to the study of gelatin gel structure, 201

Cellulose — A technique for labelling the sample surface for quick-freeze, deep-etch, rotary replication electron microscopy: application to the study of gelatin gel structure, 201

Centriole — The acentriolar state of the *Drosophila* cell lines 1182, 309

Centrosome — The acentriolar state of the *Drosophila* cell lines 1182, 309 — Diazepam induces abnormal mitosis in the early *Drosophila* embryo, 315

α-Chain network — A technique for labelling the sample surface for quick-freeze, deep-etch, rotary replication electron microscopy: application to the study of gelatin gel structure, 201

Chitinases — Attempted localization of a substrate for chitinases in plant cells reveals abundant *N*-acetyl-D-glucosamine residues in secondary walls, 343

Chromosome aberrations — Diazepam induces abnormal mitosis in the early *Drosophila* embryo, 315

Ciliate — Freeze fracture study of the plasma membrane of the marine loricate ciliate *Eufolliculina uhligi*: morphology and distribution of intramembrane particle aggregates in the swarmer and in the lorica secreting cell, 265

Ciliate protozoan — Solubilization and electrophoretic studies of cyst wall proteins of a hypotrichous ciliate, 273

Ciliated cells — Organization of actin microfilaments in the apical border of oviduct ciliated cells, 81

Ciliogenesis — *In vitro* effects of colchicine and nocodazole on ciliogenesis in quail oviduct, 67

Citochemistry — Specific characters of vessel primary walls during the early stages of wood differentiation, 221

Clofibrate — Proliferative response of foetal liver peroxisomes to clofibrate treatment of pregnant rats. A quantitative evaluation, 301

Coelomocyte — Translation in a cell-free system, and in *Xenopus* oocytes, of mRNA which specify a cadmium-binding protein in *Nereis diversicolor* (Annelida, Polychaeta), 167

Colchicine — *In vitro* effects of colchicine and nocodazole on ciliogenesis in quail oviduct, 67

Coleoptera — Immotile, aflagellate spermatozoa in Ptiliidae coelopterans, 185

Crab male hormone — Farnesylacetone, a sesquiterpenic hormone of Crustacea, inhibits electron transport in isolated rat liver mitochondria, 141

Culture — Anti-fibronectin serum inhibits the disorganization of the dermal-epidermal junction in cultured wounded skin, 91

Cyst wall — Solubilization and electrophoretic studies of cyst wall proteins of a hypotrichous ciliate, 273

Cytochemistry — Cytochemical study of abnormal intranuclear structures rich in beryllium, 147

Cytoplasmic streaming — The effects of blue and red light on *Acetabularia mediterranea* after long exposure to darkness, 227

Cytoskeleton — Microfilaments and cellular signal transduction: effect of cytochalasin D on the production of cAMP, inositol phosphates, and on calcium movements in rat parotid glands, 61 — Wheat germ agglutinin (WGA) reduces ADH-induced water flow and induces cell surface changes in epithelial cells of frog urinary bladder, 103

D

DAB immunoperoxidase — Anti-fibronectin serum inhibits the disorganization of the dermal-epidermal junction in cultured wounded skin, 91

Dermal-epidermal junction — Anti-fibronectin serum inhibits the disorganization of the dermal-epidermal junction in cultured wounded skin, 91

Diazepam — Diazepam induces abnormal mitosis in the early *Drosophila* embryo, 315

cDNA — Chromosomal localization of the mouse gene coding for the 68 kDa neurofilament subunit, 235

DRB — The effect of adenosine analogue (DRB) on a major nucleolar phosphoprotein nucleolin, 27

Drosophila — The acentriolar state of the *Drosophila* cell lines 1182, 309

Dysgenic myotubes — Ressouches A, Dussartre C, Powell J A & Koenig J, Restoration of dysgenic murine (mdg) myotube contraction after addition of Schwann cells from normal mice *in vitro*, 357

Dystrophin — Dystrophin under scrutiny, 241

E

Early *Drosophila* development — Diazepam induces abnormal mitosis in the early *Drosophila* embryo, 315

Electrophoresis — Solubilization and electrophoretic studies of cyst wall proteins of a hypotrichous ciliate, 273

Endocytic mechanism — Endocytosis in spermatids during spermiogenesis of the mouse, 291

Endocytosis — Wheat germ agglutinin (WGA) reduces ADH-induced water flow and induces cell surface changes in epithelial cells of frog urinary bladder, 103 — Benzoxazinone derivatives: new fluorescent probes for two-color flow cytometry analysis using one excitation wavelength, 193

Endoplasmic reticulum — Identification of the 16°C compartment of the endoplasmic reticulum in rat liver and cultured hamster kidney cells, 51

Endothelial cells — Are close contacts between astrocytes and endothelial cells a prerequisite condition of a blood-brain barrier ? The rat subfornical organ as an example, 159

Eosin-5'-maleimide — Fluorescence labelling of proteins related to ADH-induced change in frog bladder luminal membrane, 115

Epithelial — Characterization and serial propagation of mouse prostate epithelial cells in serum-free medium, 283

Eufolliculina — Freeze fracture study of the plasma membrane of the marine loricate ciliate *Eufolliculina uhligi:* morphology and distribution of intramembrane particle aggregates in the swarmer and in the lorica secreting cell, 265

Exocytosis — Freeze fracture study of the plasma membrane of the marine loricate ciliate *Eufolliculina uhligi:* morphology and distribution of intramembrane particle aggregates in the swarmer and in the lorica secreting cell, 265

F

F-actin — Organization of actin microfilaments in the apical border of oviduct ciliated cells, 81

Farnesylacetone — Farnesylacetone, a sesquiterpenic hormone of Crustacea, inhibits electron transport in isolated rat liver mitochondria, 141

Fiber composite — A technique for labelling the sample surface for quick-freeze, deep-etch, rotary replication electron microscopy: application to the study of gelatin gel structure, 201

Flow cytometry — Benzoxazinone derivatives: new fluorescent probes for two-color flow cytometry analysis using one excitation wavelength, 193

Fluorochromes — Benzoxazinone derivatives: new fluorescent probes for two-color flow cytometry analysis using one excitation wavelength, 193

Foetus — Proliferative response of foetal liver peroxisomes to clofibrate treatment of pregnant rats. A quantitative evaluation, 301

Freeze-fracture — Freeze fracture study of the plasma membrane of the marine loricate ciliate *Eufolliculina uhligi:* morphology and distribution of intramembrane particle aggregates in the swarmer and in the lorica secreting cell, 265

Frog skin — Anti-fibronectin serum inhibits the disorganization of the dermal-epidermal junction in cultured wounded skin, 91

Frog urinary bladder — Wheat germ agglutinin (WGA) reduces ADH-induced water flow and induces cell surface changes in epithelial cells of frog urinary bladder, 103

G

Gelatin gel — A technique for labelling the sample surface for quick-freeze, deep-etch, rotary replication electron microscopy: application to the study of gelatin gel structure, 201

Gregarines — Actin and spectrin-like (M_r = 260-240 000) proteins in gregarines, 173

H

Helicoids — A technique for labelling the sample surface for quick-freeze, deep-etch, rotary replication electron microscopy: application to the study of gelatin gel structure, 201

HPLC — Solubilization and electrophoretic studies of cyst wall proteins of a hypotrichous ciliate, 273

Hybridization — Chromosomal localization of the mouse gene coding for the 68 kDa neurofilament subunit, 235

I

Immotile spermatozoa — Immotile, aflagellate spermatozoa in Ptiliidae coelopterans, 185

Immunocytochemistry — Benzoxazinone derivatives: new fluorescent probes for two-color flow cytometry analysis using one excitation wavelength, 193

Immunoelectron microscopical identification — Immunoelectron microscopical identification of the uncoupling protein in brown adipose tissue mitochodria, 361

Immunogold labeling — Organization of actin microfilaments in the apical border of oviduct ciliated cells, 81

Immunohistochemistry — Heterogeneity of progesterone receptor expression in epithelial cells of immature and differentiating quail oviduct, 135

Immunolocalization — An analog of *Xenopus* N_1N_2 protein in *Pleurodeles waltl*, 19

***In situ* hybridization** — Transcription of dispersed repeated sequences during *Pleurodeles waltl* oogenesis, 9

In vitro — Endocytosis in spermatids during spermiogenesis of the mouse, 291

***In vitro and in vivo* translation** — Translation in a cell-free system, and in *Xenopus* oocytes, of mRNA which specify a cadmium-binding protein in *Nereis diversicolor* (Annelida, Polychaeta), 167

In vivo — Endocytosis in spermatids during spermiogenesis of the mouse, 291

Intermediate filaments — Chromosomal localization of the mouse gene coding for the 68 kDa neurofilament subunit, 235

Intracellular messengers — Microfilaments and cellular signal transduction: effect of cytochalasin D on the production of cAMP, inositol phosphates, and on calcium movements in rat parotid glands, 61

Intracellular pH — Intracellular pH and the increase in protein synthesis accompanying activation of *Xenopus* eggs, 323

Iron-sulfur centers — Farnesylacetone, a sesquiterpenic hormone of Crustacea, inhibits electron transport in isolated rat liver mitochondria, 141

L

Lampbrush chromosomes — Transcription of dispersed repeated sequences during *Pleurodeles waltl* oogenesis, 9 — An analog of *Xenopus* N_1N_2 protein in *Pleurodeles waltl*, 19

Lectins — Wheat germ agglutinin (WGA) reduces ADH-induced water flow and induces cell surface changes in epithelial cells of frog urinary bladder, 103 — Benzoxazinone derivatives: new fluorescent probes for two-color flow cytometry analysis using one excitation wavelength, 193

Liquid crystalline order — Liquid crystalline phases of sonicated type I collagen, 97

Liver peroxisomes — Proliferative response of foetal liver peroxisomes to clofibrate treatment of pregnant rats. A quantitative evaluation, 301
Localization — Heterogeneity of progesterone receptor expression in epithelial cells of immature and differentiating quail oviduct, 135

M

Membrane skeleton — Actin and spectrin-like (M_r = 260-240 000) proteins in gregarines, 173
Metalloprotein — Translation in a cell-free system, and in *Xenopus* oocytes, of mRNA which specify a cadmium-binding protein in *Nereis diversicolor* (Annelida, Polychaeta), 167
MgO crystals — A technique for labelling the sample surface for quick-freeze, deep-etch, rotary replication electron microscopy: application to the study of gelatin gel structure, 201
Mice — Characterization and serial propagation of mouse prostate epithelial cells in serum-free medium, 283 — Ressouches A, Dussartre C, Powell J A & Koenig J, Restoration of dysgenic murine (mdg) myotube contraction after addition of Schwann cells from normal mice *in vitro*, 357
Microanalysis — Cytochemical study of abnormal intranuclear structures rich in beryllium, 147
Microtubules — *In vitro* effects of colchicine and nocodazole on ciliogenesis in quail oviduct, 67
Mitochondria — Immunoelectron microscopical identification of the uncoupling protein in brown adipose tissue mitochodria, 361
Mitosis — Diazepam induces abnormal mitosis in the early *Drosophila* embryo, 315
Monoclonal anti-MP II antibodies — Translation in a cell-free system, and in *Xenopus* oocytes, of mRNA which specify a cadmium-binding protein in *Nereis diversicolor* (Annelida, Polychaeta), 167
Morphometry — Proliferative response of foetal liver peroxisomes to clofibrate treatment of pregnant rats. A quantitative evaluation, 301
Muscarinic — Microfilaments and cellular signal transduction: effect of cytochalasin D on the production of cAMP, inositol phosphates, and on calcium movements in rat parotid glands, 61
Myoneme — Motility processes in Acantharia (Protozoa). III. Calcium regulation-relaxation cycles of *in vivo* myonemes, 253

N

N_1N_2 analog — An analog of *Xenopus* N_1N_2 protein in *Pleurodeles waltl*, 19
Neoglycoproteins — Benzoxazinone derivatives: new fluorescent probes for two-color flow cytometry analysis using one excitation wavelength, 193
Nocodazole — *In vitro* effects of colchicine and nocodazole on ciliogenesis in quail oviduct, 67
Nonactin filament — Motility processes in Acantharia (Protozoa). III. Calcium regulation-relaxation cycles of *in vivo* myonemes, 253
Nonactin-based motility — Motility processes in Acantharia. II. A Ca^{2+} dependent system of contractile 2—4 nm filaments isolated from demembranated myonemes, 245
Nuclear proteins — An analog of *Xenopus* N_1N_2 protein in *Pleurodeles waltl*, 19
Nucleolar phosphoproteins — The effect of adenosine analogue (DRB) on a major nucleolar phosphoprotein nucleolin, 27
Nucleolin — The effect of adenosine analogue (DRB) on a major nucleolar phosphoprotein nucleolin, 27
Nucleus — Cytochemical study of abnormal intranuclear structures rich in beryllium, 147

O

Oocyte — An analog of *Xenopus* N_1N_2 protein in *Pleurodeles waltl*, 19
Ovalbumine — Modification of cell evagination and cell differentiation in quail oviduct hyperstimulated by progesterone, 123

P

Parasites — Benzoxazinone derivatives: new fluorescent probes for two-color flow cytometry analysis using one excitation wavelength, 193
Parasitic protozoa — Actin and spectrin-like (M_r = 260-240 000) proteins in gregarines, 173
Plant secondary cell walls — Attempted localization of a substrate for chitinases in plant cells reveals abundant *N*-acetyl-D-glucosamine residues in secondary walls, 343
Pleurodeles waltl — Transcription of dispersed repeated sequences during *Pleurodeles waltl* oogenesis, 9
Polarizing microscopy — Liquid crystalline phases of sonicated type I collagen, 97
Polychaeta — Translation in a cell-free system, and in *Xenopus* oocytes, of mRNA which specify a cadmium-binding protein in *Nereis diversicolor* (Annelida, Polychaeta), 167
Primary cell walls — Specific characters of vessel primary walls during the early stages of wood differentiation, 221
Progesterone receptor — Heterogeneity of progesterone receptor expression in epithelial cells of immature and differentiating quail oviduct, 135
Progesterone-hyperstimulation — Modification of cell evagination and cell differentiation in quail oviduct hyperstimulated by progesterone, 123
Prostate — Characterization and serial propagation of mouse prostate epithelial cells in serum-free medium, 283
Protein synthesis — Intracellular pH and the increase in protein synthesis accompanying activation of *Xenopus* eggs, 323
Protozoa — Motility processes in Acantharia. II. A Ca^{2+} dependent system of contractile 2—4 nm filaments isolated from demembranated myonemes, 245
Ptiliidae — Immotile, aflagellate spermatozoa in Ptiliidae coelopterans, 185

Q

Quail oviduct — Organization of actin microfilaments in the apical border of oviduct ciliated cells, 81 — Modification of cell evagination and cell differentiation in quail oviduct hyperstimulated by progesterone, 123 — Heterogeneity of progesterone receptor expression in epithelial cells of immature and differentiating quail oviduct, 135
Quantitative immunocytochemistry — The effect of adenosine analogue (DRB) on a major nucleolar phosphoprotein nucleolin, 27
Quick-freeze artifacts — A technique for labelling the sample surface for quick-freeze, deep-etch, rotary replication electron microscopy: application to the study of gelatin gel structure, 201

R

Rat — Proliferative response of foetal liver peroxisomes to clofibrate treatment of pregnant rats. A quantitative evaluation, 301
Rat liver — Identification of the 16°C compartment of the endoplasmic reticulum in rat liver and cultured hamster kidney cells, 51
Rat parotid glands — Microfilaments and cellular signal transduction: effect of cytochalasin D on the production of cAMP, inositol phosphates, and on calcium movements in rat parotid glands, 61
Receptor-mediated endocytosis — Pathway and kinetics of vitellogenin-gold internalization in the *Xenopus* oocyte, 37
Red and blue light — The effects of blue and red light on *Acetabularia mediterranea* after long exposure to darkness, 227
Respiratory chain complexes — Farnesylacetone, a sesquiterpenic hormone of Crustacea, inhibits electron transport in isolated rat liver mitochondria, 141
mRNA — Translation in a cell-free system, and in *Xenopus* oocytes, of mRNA which specify a cadmium-binding protein in *Nereis diversicolor* (Annelida, Polychaeta), 167
rRNA migration — The effects of blue and red light on *Acetabularia mediterranea* after long exposure to darkness, 227
rRNA synthesis — The effects of blue and red light on *Acetabularia mediterranea* after long exposure to darkness, 227
Rosettes — Freeze fracture study of the plasma membrane of the marine loricate ciliate *Eufolliculina uhligi*: morphology and distribution of intramembrane particle aggregates in the swarmer and in the lorica secreting cell, 265

S

S1 decoration — Organization of actin microfilaments in the apical border of oviduct ciliated cells, 81

Schwann cells — Ressouches A, Dussartre C, Powell J A & Koenig J, Restoration of dysgenic murine (mdg) myotube contraction after addition of Schwann cells from normal mice *in vitro*, 357
Secretion — Freeze fracture study of the plasma membrane of the marine loricate ciliate *Eufolliculina uhligi*: morphology and distribution of intramembrane particle aggregates in the swarmer and in the lorica secreting cell, 265
Selective extraction — Specific characters of vessel primary walls during the early stages of wood differentiation, 221
Serum-free medium — Characterization and serial propagation of mouse prostate epithelial cells in serum-free medium, 283
Sex-linked alleles — Genetic evidence for linkage with the Z and W sex chromosomes of two distinct couples of alleles controlling larval and postmetamorphic skin pigmentation in salamander, 1
Skin pigmentation — Genetic evidence for linkage with the Z and W sex chromosomes of two distinct couples of alleles controlling larval and postmetamorphic skin pigmentation in salamander, 1
Southern blots — Chromosomal localization of the mouse gene coding for the 68 kDa neurofilament subunit, 235
Spermatid — Endocytosis in spermatids during spermiogenesis of the mouse, 291
Subfornical organ — Are close contacts between astrocytes and endothelial cells a prerequisite condition of a blood-brain barrier ? The rat subfornical organ as an example, 159
Surface marker — A technique for labelling the sample surface for quick-freeze, deep-etch, rotary replication electron microscopy: application to the study of gelatin gel structure, 201

T

Temperature — Identification of the 16°C compartment of the endoplasmic reticulum in rat liver and cultured hamster kidney cells, 51
Transcellular potential — The effects of blue and red light on *Acetabularia mediterranea* after long exposure to darkness, 227
Transcription of repeated sequences — Transcription of dispersed repeated sequences during *Pleurodeles waltl* oogenesis, 9
Transition vesicle — Identification of the 16°C compartment of the endoplasmic reticulum in rat liver and cultured hamster kidney cells, 51
Twisted filament system — Motility processes in Acantharia. II. A Ca^{2+} dependent system of contractile 2—4 nm filaments isolated from demembranated myonemes, 245
Type I collagen — Liquid crystalline phases of sonicated type I collagen, 97

U

Uncoupling protein — Immunoelectron microscopical identification of the uncoupling protein in brown adipose tissue mitochodria, 361
Unicellular eucaryotes — Actin and spectrin-like (M_r = 260-240 000) proteins in gregarines, 173

V

Vitellogenin — Pathway and kinetics of vitellogenin-gold internalization in the *Xenopus* oocyte, 37

W

Water channels — Fluorescence labelling of proteins related to ADH-induced change in frog bladder luminal membrane, 115
Water movements — The effects of blue and red light on *Acetabularia mediterranea* after long exposure to darkness, 227
Water permeability ADH — Wheat germ agglutinin (WGA) reduces ADH-induced water flow and induces cell surface changes in epithelial cells of frog urinary bladder, 103
Weak bases — Intracellular pH and the increase in protein synthesis accompanying activation of *Xenopus* eggs, 323
WGA/ovomucoid—gold complex — Attempted localization of a substrate for chitinases in plant cells reveals abundant *N*-acetyl-D-glucosamine residues in secondary walls, 343
Wheat germ agglutinin (WGA) — Wheat germ agglutinin (WGA) reduces ADH-induced water flow and induces cell surface changes in epithelial cells of frog urinary bladder, 103

X

***Xenopus* egg** — Intracellular pH and the increase in protein synthesis accompanying activation of *Xenopus* eggs, 323
***Xenopus* oocyte** — Pathway and kinetics of vitellogenin-gold internalization in the *Xenopus* oocyte, 37
Xylem differentiation — Specific characters of vessel primary walls during the early stages of wood differentiation, 221
